Cincinnati, OH | 513.310.6388 | 1sharp@gmail.com | <https://1sharp.github.io/HireChris>

Core Focus: Data Analytics, Software Systems, API Integrations, Process Optimization

Data Analyst specializing in SaaS systems, integrations, and process optimization. Experienced in connecting platforms using APIs and data workflows to improve efficiency and data accuracy. Proven ability to identify inefficiencies and deliver measurable cost savings through analysis and system optimization. Brings a disciplined, problem-solving mindset to complex technical and operational challenges.

Data Integration & Automation: Power Automate, ETL Concepts, Python (Automation/Scripting), Data Mapping/Pipelines

Advanced Excel & Mathematics: Power Query, Pivot Tables, VBA, Data Modeling, Standard Deviation, Forecasting

API Integrations: REST/JSON, SOAP/XML, GraphQL, Postman, CLI Tools (Bash, PowerShell)

Data Analysis & Visualization: Power BI, Smartsheet, Dashboards, SharePoint

ATS & HR Systems: Workday, Jobvite, Indeed, LinkedIn, UKG/UTA, NetSuite

Business Impact: Process Improvement & Cost Optimization

Education & Professional Development

Bachelor's Degree: Criminal Justice – University of Cincinnati – Cincinnati, OH

Professional Development – Computerized Business Technology – Grant Career Center – Bethel, OH

Professional Experience

Data Analyst, Talent Acquisition – SBM Management | Cincinnati, OH

12/2024–3/2026

- Developed KPI dashboards utilizing Smartsheet to analyze performance, identify trends, and drive data informed hiring decisions.
- Built and analyzed ad hoc datasets (TTF, TTH, Days Open, # of Hires) to deliver insights for C-Suite reporting.
- Identified inefficiencies in recruiting spend, generating ≈ **\$156,000/year in cost savings**
- **Recovered ≈ \$50,000** in 3rd party vendor billing errors through audit analysis
- Successfully implemented Workday by building integrations to/from Indeed, LinkedIn, and ZipRecruiter.
- Developed Python scripts to scrape and validate platform data, ensuring consistency across integrated systems.
- Created Python scripts to validate JSON payloads and confirmed accurate data transmission across Workday API integrations.
- Extracted and analyzed PDF data using Python, identifying key fields and validating outputs.
- Tested API endpoints and performed end to end validation to maintain data integrity across systems.
- Led field mapping efforts and built validation checks to identify and resolve data discrepancies.
- Collaborated with cross-functional teams and leadership to track progress and support successful integration deployments.
- SharePoint Development, Designed, built, and maintained an internal SharePoint site to centralize departmental resources and improve collaboration.
- Led integration efforts connecting LinkedIn, Indeed, ZipRecruiter, and Adobe with Workday using REST, SOAP/XML, GraphQL, and JSON APIs.
- Used tools such as Postman, cURL, and Python to test endpoints, validate integration payloads, and troubleshoot data flow.
